 Dozois/Plaine Carried
- **4. Update from the Chair:** The Chair began with thanks to Emily for doing such a great job as acting chair during the past few months-all were in agreement. He then recapped the READ's presentation to the OPL Board on Sept 6th which was done at the beginning of the board meeting. The presentation was followed by questions and then the board's consideration of two facilities reports: the *Library Facilities Framework and Investment and Growth Planning Study Report* by staff and the *OPL Library Facilities Investment and Growth Planning Study* by external consultant Danix Management Ltd (Daniel Nixey) which informed the staff report.

The staff report included a facilities framework which summarized the approach for new, expanded or renewed facilities; a list of branch renewal priorities for 2016-2021 (Rosemount, Centennial, North Gower and Orleans). The consultant's report addressed the issue of financing both new builds and renovations. The new builds identified were: Barrhaven and Riverside South with future service gaps (requiring new builds) in Orleans and Kanata as well as in the four rural quadrants with the largest being in the rural north-east. For the new builds the capital requirement was identified as \$34.6M

including an allocation of \$9.6 million to collections (from DC charges). The consultant stated that Development Charges funding would meet some but not all the funding need and there would be a funding gap of \$7M. All READ meeting attendees are encouraged to read these very important <u>reports</u>.

The Chair also commented that the population figures included in the consultant's report seemed to differ from the READ figures which were obtained from the City of Ottawa (Ian Cross) and based on the catchment area map supplied by OPL. The consultant's report showed the majority of growth in the suburban area just outside the green belt (next 1-8 years). However the report (aggregating population growth into 12 growth zones) also indicated that later in the projection period residential intensification inside the Greenbelt is expected to accelerate (9th to 16th years). It was clear and acknowledged that renewal in the inner city is expensive because of the lack of availability of Development Charge funds. Both OPL documents are available on the OPL website in the board section.

The OPL Board gave the following direction to staff:

1. Direct staff to consider including an option to develop a Business Case for a new build Rosemount branch as part of the 2017 budget process.

Following the presentation there were several media articles focusing on READ's presentation. They can all be found on the <u>READ Rosemount website</u> under Media.
